FUND'S PERFORMANCE COMPARED TO BENCHMARK

FUND MANAGER'S REPORT

With 10 years US Treasury benchmark closing below psychological level of 3.0%, 2/10years spread narrowed to 21 basis points at the end of November. The only time it was this narrow in the last 11 years was in August. Revisiting this level this round can be attributed to Federal Reserve's Chairman Powell's dovish statement that 'benchmark interest rates was "just below" neutral level' hinting that rate hikes frequency may decelerate and doubts as to whether the ongoing G20 meeting in Argentina can provide a platform to trade rift resolution.

November saw oil prices plunge with Brent crude oil dropping 22% from USD75 to USD58.

Malaysia's 2019 budget came in gentler than expected. Gross Domestic Product has been downwardly revised to 4.8% from 5.0% while fiscal consolidation of 3.7% in 2018 and 3.4% in 2019 allows for conservative expansion.

Based on the Fund's portfolio returns as at 31 October 2018, the Volatility Factor (VF) for this Fund is 0.9 and is classified as "Very Low" (source: Lipper). "Very Low" includes funds with VF that are above 0 but not more than 1.885 (source: Lipper). The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quantile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.
