KEY FUND FEATURES

3. What am I investing in?

Launch date	30 July 2007
Initial Offer Price	RM0.5000
Objective of the Fund	To provide long-term investors with high level of income stream (income could be in the form of Units or cash) and an opportunity for capital appreciation.
Investment Strategy	The Fund will invest a minimum of 70% of its NAV in Money Market Instruments and Fixed Income Securities including collective investment schemes that invest in Fixed Income Securities with a minimum of 2% of its NAV in liquid assets. The Fund may also invest up to 25% of its NAV (at time of purchase) in listed equities and equity-related securities including initial public offerings, warrants and collective investment schemes that invest primarily in equities at any time to enhance income and returns to the Fund. However, the Fund may continue to hold its investment in equities even if the Fund's holding exceeds 25% of its NAV due to appreciation or depreciation of the NAV of the Fund, whether as a result of an appreciation or depreciation in value of the investment, or as a result of repurchase of Units or payments made by the Fund.
Asset Allocation	<ul style="list-style-type: none"> ▪ Fixed Income Securities and Money Market Instruments (other than those classified as liquid assets) Minimum 70% of the NAV of the Fund ▪ Liquid assets Minimum 2% of the NAV of the Fund ▪ Listed equities and equity-related securities Up to 25% of the NAV of the Fund (at time of purchase)

5. What are the possible outcomes of my investment?
--

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed. The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the Maybank's 12-month fixed deposit rate. However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

KEY RISKS

6. What are the key risks associated with this fund?

PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).

Below are the risks associated in the product which may cause significant losses if they occur.

General risks of investing in the Unit Trust Funds

- **Market Risk**
Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
- **Liquidity Risk**
Liquidity risks refer to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund hold assets that illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
- **Inflation Risk**
This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
- **Manager's Risk**
This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
- **Loan Financing Risk**
The risk occurs when investors take a loan/financing to finance their investment and thereafter unable to service the loan repayments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Performance Risk**
As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when sold and an investment may be worth more or less than when purchased.

Specific risks associated with the investment portfolio of Areca enhancedINCOME Fund

- **Credit/default risk**
Credit/default risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.
- **Interest Rate Risk**
Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.
- **Counterparty risk**
A Fund that invests in Structured Products or options will be subjected to counterparty risk. This risk refers to the possibility of the issuer of the Structured Products or options being unable to make payments and/or paying the obligations in a timely manner. This in turn could lead to lower or zero valuation of the Structured Products or options if the issuer is in default. It will have an adverse impact to the NAV of the Funds.
- **Country Risk**
Investments of the Funds in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Funds invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Funds in those affected countries. This in turn may cause the NAV or prices of Units to fall.

▪ **Currency Risk**

As the base currency of the Funds is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The abovementioned risks which you should consider before investing into a unit trust fund should not be considered to be an exhaustive list.

You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

FEES & CHARGES

7. What are the fees and charges involved?

Entry Fee (Sales Charge)	Up to 1.00 % of the amount invested. The entry fee payable for investments in a Fund is equivalent to the specified percentage of the NAV per unit of the Fund.
Exit Fee	Up to 0.50% of the amount liquidated if redemption is made on Units invested for a duration of less than 6 months ** ** The maximum rate of exit fee to be imposed by each distribution channel (i.e. direct investment through the Manager and third party distributors including IUTA). However, we will waived the exit fee if Units redeemed (including distributions/unit split for calculation, if any) have not made any profit.
Switching Fee	Not Applicable
Transfer Fee	NIL
Annual Management Fee	1.40% p.a. of NAV of the Fund.
Annual Trustee Fee	0.08% p.a. of NAV of the Fund.

The above fees and charges are exclusive of goods and services tax and/or duties as may be imposed by the government and/or the relevant authorities from time to time.

How will I be notified of any increase in fees and charges?

- A written communication will be sent to unit holders to notify of the higher rate and its effective date;
- A supplementary or replacement Prospectus will be lodged and issued.

VALUATION AND EXITING FROM INVESTMENT

8. How often are valuations available?

The valuation of the assets of the Fund is carried out on each Business Day.

The NAV per unit of the Fund will generally be published on the following Business Day (T+1 day) in various major local newspapers and may also be found on the Manager's website at www.arecacapital.com.
