<b>5. What are the possible outcomes of my investment?</b>
--

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed. The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the Maybank's 6-month fixed deposit rate. However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

<b>KEY RISKS</b>
------------------

<b>6. What are the key risks associated with this fund?</b>
---

**PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).**

Below are the risks associated in the product which may cause significant losses if they occur.

**General risks of investing in the Unit Trust Funds**

- **Market Risk**  
Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
- **Liquidity Risk**  
Liquidity risks refer to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund hold assets that illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
- **Inflation Risk**  
This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
- **Manager's Risk**  
This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
- **Loan Financing Risk**  
The risk occurs when investors take a loan/financing to finance their investment and thereafter unable to service the loan repayments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Performance Risk**  
As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when sold and an investment may be worth more or less than when purchased.

**Specific risks associated with the investment portfolio of Areca incomeTRUST Fund**

- **Credit/default risk**  
Credit/default risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.
- **Interest Rate Risk**  
Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.
- **Counterparty risk**  
A Fund that invests in Structured Products or options will be subjected to counterparty risk. This risk refers to the possibility of the issuer of the Structured Products or options being unable to make payments and/or paying the obligations in a timely manner. This in turn could lead to lower or zero valuation of the Structured Products or options if the issuer is in default. It will have an adverse impact to the NAV of the Funds.
- **Country Risk**  
Investments of the Funds in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Funds invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Funds in those affected countries. This in turn may cause the NAV or prices of Units to fall.
- **Currency Risk**  
As the base currency of the Funds is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The abovementioned risks which you should consider before investing into a unit trust fund should not be considered to be an exhaustive list.

You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

## FEES & CHARGES

### WHAT IS VERSATILE INVESTMENT PORTFOLIO?

Versatile Investment Portfolio (**VIP**) is an investment facility designed by the Manager to provide you with an investment strategy which offers the flexibility to tailor your ideal investment solutions. The **VIP** provides you with a professional diversified portfolio with access to two types of asset classes – equity and fixed income funds with unlimited free switches between the selected Funds. It is an easy and convenient way for you to manage and customise your investment portfolios according to your investment goals, risk profiles and prevailing market conditions.

#### Benefits Of Investing Through VIP

- **Choice**  
One-stop solution with a choice to diversify your investment into 2 different asset classes that suits your needs.
- **Simple and Flexible**  
You can switch between selected funds at any time by filling up a switch form without incurring switching fee. This may potentially enable you to maximise your returns, and allows you to easily change your strategy to keep pace with your needs.
- **Active Participation**  
Enables you to be more financially aware of changing trends in the financial markets and the impact on your investments and encourages you to adopt a more pro-active approach to personal investing rather than re-active approach.
- **Deal Direct With Low Front End Fee**  
In our commitment to bring personalised investor care and attention to you, we have made a unique stance to offer the funds under **VIP** and investment expertise predominantly through our full-time salaried employees with low front end fee. As salaried employees, the service personnel are focused on enhancing your total investment experience with us over the Long-Term period. It has also a simple and easy to understand fee structure that allows you to know exactly what you are being charged.

#### Standalone incomeTRUST Fund

Investors may also invest **ONLY** in Areca incomeTRUST Fund on a standalone basis (if you do not wish or are not ready to invest in equity fund) without the benefit of the free switches. Investors can access the **VIP** switch option through a conversion facility.

\* Versatile Investment Portfolio (VIP)

#### STANDALONE ARECA INCOMETRUST FUND

Below are the charges directly incurred by investors who invest ONLY in Areca incomeTRUST Fund on a standalone basis without the benefit of the VIP switching facility.

**ENTRY FEE** - Up to 0.15% of the amount invested

**EXIT FEE** - Up to 0.50% of the amount liquidated if liquidation is made on Units invested for a duration of less than 6 months. (However, this exit fee would be waived if Units liquidated (including distributions/unit split for calculation, if any) have not made any profit/gain.

**The above fees and charges are exclusive of goods and services tax and/or duties as may be imposed by the government and/or the relevant authorities from time to time.**

#### CONVERSION FACILITY

Unit Holders can avail themselves to the VIP switching facility by paying a one-off conversion fee (the entry fee for VIP less the entry fee paid earlier).

**How will I be notified of any increase in fees and charges?**

- A written communication will be sent to unit holders to notify of the higher rate and its effective date;
- A supplementary or replacement Prospectus will be lodged and issued.

**VALUATION AND EXITING FROM INVESTMENT**

**8. How often are valuations available?**

The valuation of the assets of the Fund is carried out on each Business Day.
