ARECA DIVIDEND INCOME FUND

BRIEF INFORMATION ON THE FUND

1. What is this fund about?

Fund category / type	Equity (income and growth) Fund
Manager	Areca Capital Sdn Bhd (200601021087 (740840-D))
Trustee	Maybank Trustees Berhad (196301000109 (5004-P))

PRODUCT SUITABILITY**2. Who is this fund suitable for?**

This Fund is suitable for Investors who:

- seek regular income and capital appreciation;
- seek diversified investment;
- have a moderate-to-high risk-tolerance; and
- have a long term investment horizon.

KEY FUND FEATURES**3. What am I investing in?**

Launch date	15 February 2017
Initial Offer Price	RM1.0000 (Fixed during Initial Offer Period)
Objective of the Fund	The Fund seeks to provide regular income while providing long term capital appreciation Note: Any material change to the investment objective of the Fund would require Unit Holders' approval.
Investment Strategy	<p>The Fund will invest in income-generating securities, including dividend-paying shares, preference shares and other equity-related securities, to achieve its objective. We seek to make quarterly distribution (cash payout) of realised income from the Fund to investors. The Fund will invest a maximum of 98% of its NAV (at least 70% locally and a maximum 28% in Asia region) in income-generating securities with a minimum of 2% of its NAV in liquid assets.</p> <p>The Fund may invest in units or shares of other CIS in Malaysia which have similar objective, for the purpose of liquidity and diversification (spread of investments and risks).</p> <p>The Manager adopts an active investment strategy in managing the Fund and will invest tactically during uncertain times (by changing the equity exposure in the range of 70% to 98%). Focus will be on companies / issuers with sound management practice, resilient business models, good earning prospects and relative low valuations. The Manager may also invest in growth or recovery stocks which have the potential to adopt a strong dividend payout policy.</p> <p>Trading strategy will depend on the market opportunities and the anticipated sales and Redemption requests by the investors. An active investment strategy and the presence of equities in the portfolio will inherently introduce more volatility in the Fund. We may appoint licensed investment advisor or external fund managers for investment advice on stocks recommendation to add value to stocks selections (the fund management function will be undertaken by the Manager).</p>
Asset Allocation	<ul style="list-style-type: none"> ▪ Equities and equity-related securities 70%-98% of the NAV of the Fund ▪ Liquid Assets Minimum 2% of the NAV of the Fund
Performance Benchmark	The performance benchmark of the Fund is the 1-year Average Returns of the funds under "Equity Malaysia Income" Non-Islamic category. The information on the benchmark is available at www.arecacapital.com (the Average Returns can also be obtained from the weekly Edge / Lipper Fund Table). The Management Company will reassess a suitable benchmark for the Fund should there be any changes to the Lipper Fund Table.
Income Distribution and Reinvestment Policy	<p>The Fund will declare income distribution quarterly subject to the availability of the realized income received.</p> <p>In the absence of written instructions from a Unit Holder, we are entitled to reinvest the income distributed from the Fund in additional Units of that Fund at the NAV per Unit at the end of the distribution day with no entry fee.</p>
Financial Year End	30 September

4. Who am I investing in?

5. What are the possible outcomes of my investment?

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that **the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed.** The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the 1-year Average Returns of the funds under "Equity Malaysia Income" Non-Islamic category (The Average Returns can also be obtained from the weekly Edge / Lipper Fund Table). However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

KEY RISKS**6. What are the key risks associated with this fund?**

PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).

Below are the risks associated in the product which may cause significant losses if they occur.

General risks of investing in the Unit Trust Fund

- **Market Risk**
Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
- **Liquidity Risk**
Liquidity risks refer to the ease of liquidating an asset depending on the asset's volume traded in the market. If the fund hold assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices.
- **Inflation Risk**
This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
- **Manager's Risk**
This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
- **Loan Financing Risk**
The risk occurs when investors take a loan/financing to finance their investment and thereafter unable to service the loan repayments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Performance Risk**
As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when sold and an investment may be worth more or less than when purchased.
- **Non-Compliance Risk**
This risk refers to the possibility that the manager may not follow the provisions set out in the prospectus or the deed or the laws, rules, guidelines or internal operating policies which governs the fund. Non-compliance may occur directly due to factors such as

human error or system failure and can also occur indirectly due to amendment on the relevant regulatory frameworks, laws, rules, and other legal practices affecting the fund. This risk may result in operational disruptions and potential losses to the fund. The manager aims to reduce this risk by placing stringent internal policies and procedures and compliance monitoring processes to ensure that the fund is in compliance with the relevant regulations or guidelines.

- **Suspension of Redemption Request Risk**

Having considered the best interests of Unit Holders, the Redemption requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks associated with the investment portfolio of Areca Dividend Income Fund

- **Stock Specific Risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

- **Equity-related Securities Risk**

A Fund that invest in equity-related securities such as rights and warrants, where price movement is dependent on the price movement of the underlying equities the risk is generally higher than their underlying equities as these equity related securities are leveraged form of investment. The price of equity-related securities generally fluctuates more than the underlying equities and consequently may affect the volatility of the Funds' NAV. For example, warrants have a limited life and will depreciate in value as they approach their maturity date. If a warrant's exercise price is above the share price at any time during its remaining subscription period, the warrant will theoretically carry little value and warrants that are not exercised at the maturity date become worthless.

- **Country Risk**

Investments of the Fund in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV or prices of Units to fall.

- **Currency Risk**

As the base currency of the Fund is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The above should not be considered to be an exhaustive list of the risks which investors should consider before investing in the Fund.

You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.
