**PRODUCT SUITABILITY****2. Who is this fund suitable for?**

This Fund is suitable for Investors who:

- Seek regular income
- Have a low risk tolerance; and
- Have a Short-Term to Medium-Term investment horizon; and
- Seek exposure in fixed income market.

**KEY FUND FEATURES****3. What am I investing in?**

Launch date	23 April 2007
Objective of the Fund	To provide investors with short to medium term capital preservation <sup>#</sup> and a regular income (income could be in the form of Units or cash).
Investment Strategy	The Fund may invest up to 98% of its NAV in Fixed Income Securities and Money Market Instruments with a minimum of 2% of its NAV in Liquid Assets. The minimum credit rating for Money Market Instruments and other Fixed Income Securities (other than government and government related securities) that the Fund shall invest in is the credit rating of 'A3' by RAM or such equivalent rating by other rating agencies. Notwithstanding the above and subject to the person(s) or members of a committee undertaking the oversight function of the Fund unanimous approval, the Fund may invest up to 25% of its NAV in Fixed Income Securities with a credit rating below the minimum 'A3' rating including unrated issues. The Fund may continue to hold its investment in Fixed Income Securities with a credit rating below 'A3' even if the holdings exceeds 25% of its NAV due to appreciation or depreciation of the NAV of the Fund, whether as a result of an appreciation or depreciation in value of the investments, or as a result of repurchase of Units or other payment made by the Fund. Under normal circumstances, the weighted average Duration is expected to be approximately 2 to 5 years.
Asset Allocation	<ul style="list-style-type: none"> <li>▪ <b>Fixed Income Securities and Money Market Instruments (other than those classified as Liquid Assets)</b> Maximum 98% of the NAV of the Fund</li> <li>▪ <b>Liquid Assets</b> Minimum 2% of the NAV of the Fund</li> </ul>
Performance Benchmark	Maybank's 6-month fixed deposit rate.
Income Distribution and Reinvestment Policy	Twice a year, subject to availability of distributable income.  In the absence of written instructions from a Unit Holder, we are entitled to reinvest the income distributed from the Fund in additional Units of that Fund at the NAV per Unit at the end of the distribution day with no entry fee.
Financial Year End	30 June

<sup>#</sup>The Fund is not a capital guaranteed fund.

## 5. What are the possible outcomes of my investment?

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed. The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the Maybank's 6-month fixed deposit rate. However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

## KEY RISKS

## 6. What are the key risks associated with this fund?

**PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).**

Below are the risks associated in the product which may cause significant losses if they occur.

### General risks of investing in the Unit Trust Funds

- **Market Risk**  
Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
- **Liquidity Risk**  
Liquidity risks refer to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund hold assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
- **Inflation Risk**  
This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
- **Manager's Risk**  
This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
- **Loan Financing Risk**  
The risk occurs when investors take a loan/financing to finance their investment and thereafter unable to service the loan repayments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.
- **Performance Risk**  
As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when sold and an investment may be worth more or less than when purchased.
- **Non-Compliance Risk**  
This risk refers to the possibility that the manager may not follow the provisions set out in the prospectus or the deed or the laws, rules, guidelines or internal operating policies which governs the fund. Non-compliance may occur directly due to factors such as human error or system failure and can also occur indirectly due to amendment on the relevant regulatory frameworks, laws, rules, and other legal practices affecting the fund. This risk may result in operational disruptions and potential losses to the fund. The manager aims to reduce this risk by placing stringent internal policies and procedures and compliance monitoring processes to ensure that the fund is in compliance with the relevant regulations or guidelines.
- **Suspension of Redemption Request Risk**  
Having considered the best interests of Unit Holders, the Redemption requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In

such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the Fund.

#### Specific risks associated with the investment portfolio of Areca incomeTRUST Fund

- **Credit/default risk**  
Credit/default risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.
- **Interest Rate Risk**  
Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.
- **Counterparty risk**  
A Fund that invests in Structured Products or options will be subjected to counterparty risk. This risk refers to the possibility of the issuer of the Structured Products or options being unable to make payments and/or paying the obligations in a timely manner. This in turn could lead to lower or zero valuation of the Structured Products or options if the issuer is in default. It will have an adverse impact to the NAV of the Funds.
- **Country Risk**  
Investments of the Fund in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Funds in those affected countries. This in turn may cause the NAV or prices of Units to fall.
- **Currency Risk**  
As the base currency of the Fund is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The abovementioned risks which you should consider before investing into a unit trust fund should not be considered to be an exhaustive list.

You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.
