FUND MANAGER'S REPORT

The FBM KLCI gained 0.1% to close at 1,726 points in Aug. Similarly, the broader market FBM Emas Index advanced 0.1% to 12,765 points, while the FBM Small Cap Index gained 2.6% to 16,118 points in the same period.

Foreign investors were net sellers in August, recording net outflows of RM1.9 billion (July 2026: net inflows of RM264 million). Local indices were relatively flat for the month, as stronger domestic macroeconomic momentum and corporate earnings helped offset persistent foreign selling and geopolitical concerns. Malaysia's GDP growth accelerated to 6.0% Y/Y in 2Q26 from 5.4% in 1Q26, beating expectations.

The near-flat KLCI print concealed weak market breadth and persistent foreign selling, and the muted reaction to strong GDP data suggests much of the positive macro narrative is already reflected in valuations. Corporate earnings, however, remain reasonably constructive, 7% to 8% FBM KLCI growth remains plausible. We remain constructive on earnings but increasingly disciplined on price, favouring structural winners where valuations are justified while selectively adding overlooked quality names.

The Fund will continue to hold high-quality dividend yield names, particularly in financials, REITs and utilities, while selectively accumulating oversold stocks during periods of weakness. The fund has also locked in partial profits and rotated into large-cap names during periods of market weakness. Meanwhile, a healthy cash position is maintained to accumulate fundamentally strong companies when opportunities arise.

DISCLAIMER

Based on the Fund's portfolio returns as at 31 July 2026, the Volatility Factor (VF) for this Fund is 9.8 and is classified as "Moderate" (source: Lipper). "Moderate" includes funds with VF that are above 8.725 but not more than 11.88. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.
