FUND MANAGER'S REPORT

Equities closed weaker in the month of December 2024, with both Developed and Emerging Markets down. The 10-year US treasury yield increased from 4.17% in November 2024 to 4.57% in December 2024. The US Dollar Index increased 2.6% MoM to close at 108.5 points.

The FBM KLCI increased 3.0% MoM to close at 1,642.3 points in December 2024. Historically, December has tended to be a positive month for Malaysian equities and this trend has continued in 2024. The best performing sectors for the month were technology and healthcare. Laggard sectors were finance and consumer. Foreign investors were net sellers for the month at RM2.9 billion.

We hold on to our high-quality dividend yield names, especially in financials to cushion the market volatility. During the month, we have also taken some profit on winners and raised our cash level. With our current position in place, we plan to accumulate high-quality stocks during periods of weakness, focusing on those with strong fundamentals that are well-positioned for long-term secular growth.
