Based on the Fund's portfolio returns as at 30 April 2026, the Volatility Factor (VF) for this Fund is 22.8 (MYR Class & USD Class) and is classified as "Very High" (source: Lipper). "Very High" includes funds with VF that are above 15.965. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.

This document is prepared for information purposes only and is not intended to be an offer or invitation to subscribe or purchase of securities. The information contained herein has been obtained from sources believed in good faith to be reliable; however, no guarantee is given in its accuracy or completeness. Past performances of the Fund is not an indicative of future performance. Prices can go down as well as up and you may not get back the amount you originally invested. A copy of the Information Memorandum dated 30 September 2020 has been lodged with the Securities Commission Malaysia, who takes no responsibility for its contents. Investors are advised to read the Information Memorandum and Product Highlight Sheet before making any investment decision. The Information Memorandum and Product Highlight Sheet are available at offices of Areca Capital Sdn Bhd or its authorised distributors and investors have the right to request for a copy of the Information Memorandum and Product Highlight Sheet. Investors should also consider the fees and charges involved. The Fund may not be suitable for all and if in doubt, investors should consult a professional adviser. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, investors should be highlighted of the fact that the value of their investment in Malaysian ringgit will remain unchanged after the distribution of the additional units.

The Manager wishes to highlight the specific risks of the Fund are interest rate risk, credit / default risk, liquidity risk and issuer risk. These risks and other general risks are elaborated in the Master Prospectus.

This Fund Factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.

3) Lens Technology Co Ltd	7.6
4) NAURA Technology Group Co. Ltd	7.4
5) Shanghai Henlius Biotech Inc	7.4

ASSET, SECTOR & COUNTRY ALLOCATION (% OF NAV)

FUND MANAGER'S REPORT

Hong Kong equities broadly lagged a powerful US rally in May, with the Hang Seng Index falling 2.3%; the Hang Seng TECH Index, however, proved notably more resilient, posting a marginally positive return of around +0.3% in HKD terms (+0.03% in MYR) and holding up far better than the broader market. The pivotal Trump–Xi summit in Beijing (14–15 May) signalled "strategic stability" and yielded an agricultural purchase pledge and broader cooperation framework, though Xi's pointed warning on Taiwan tipped sentiment negative on the day; more significant for the sector, reports that the US had cleared Nvidia H200 sales to China raised the prospect of easing AI-related export controls—albeit tempered by Beijing's parallel mandate for domestically produced chips in state-funded data centres. We retain a constructive long-term view, with the structural thesis intact: an accommodative monetary stance with room for further RRR cuts, active fiscal support, an AI-driven corporate earnings cycle, and a robust Hong Kong IPO pipeline. The summit reduced near-term trade-escalation risk, while an improving Strait of Hormuz trajectory eases energy-cost pressure on China, the world's largest crude importer; the unresolved Taiwan dynamic and the November 2026 trade-truce expiry remain the principal risks markets will increasingly price. With Hong Kong technology valuations still attractive versus US peers on both earnings and book value, we continue to treat geopolitically-driven volatility as opportunities to selectively add quality exposure across AI, semiconductors, and digital-infrastructure beneficiaries, while staying disciplined on entry levels.

Based on the Fund's portfolio returns as at 30 April 2026, the Volatility Factor (VF) for this Fund is 22.8 (MYR Class & USD Class) and is classified as "Very High" (source: Lipper). "Very High" includes funds with VF that are above 15.965. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.
