FUND MANAGER'S REPORT

Global markets were volatile in February as weaker data and sentiment hinged on tariff concerns. Yields on US Treasuries slid month end as market participants prepare for US President Donald Trump's tariff on Canada and Mexico to go into effect.

Locally, Malaysia's economy grew +5.1% in 2024 whilst Gross Domestic Product (GDP) growth moderated to 5.0% Y-o-Y in 4Q2024. The stronger performance was buoyed by favourable domestic demand prospects following solid labour market conditions and the government's continued policy measures, upside on investment upcycle and higher tourist arrivals and spending. Malaysian sovereign bonds remained highly active, driven by onshore players engaging in rebalancing and liquidity management. The 5.5-year Islamic bond auction received strong bid to cover ratio of over 3x despite a larger than expected issue size.

Expectations for the Bank Negara Malaysia (BNM) to stay put at its monetary policy meeting for March should lend some support to the Malaysian currency.
