FUND MANAGER'S REPORT

The Federal Reserve ("Fed") unanimously raised its policy rate by 25 basis points ("bps") to 3.75%–4.00%, marking its first hike since July 2023, as sticky inflation and resilient economic growth left little room for the Fed to hold. August Headline Consumer Price Index ("CPI") and Core Personal Consumption Expenditure ("PCE") stayed sticky at 3.4% and 3.0% Year-on-Year ("YoY"), respectively, while the US S&P Global Manufacturing Purchasing Managers' Index ("PMI") jumped to 55.9 (August: 53.9), its strongest reading since May 2022. However, hiring momentum moderated, with September non-farm payrolls rising by only 29,000 (consensus: +90,000) and unemployment edging up to 4.2% (August: 4.1%). With the September dot plot signalling one more hike in 2026, markets continued to price in the possibility of another rate hike in December 2026, keeping US Treasury ("UST") yields under upward pressure. The 10-year UST yields rose above 5% to close at 5.29% as at month-end, while the 30-year UST yields closed at 5.64%.

Locally, headline inflation edged higher to 1.9% YoY in August (July: 1.8%), while the unemployment rate held stable at 3.0%. Exports surged 45.5% YoY to RM191.05 billion in August, supported by higher manufactured and mining goods exports. However, Malaysia's S&P Global Manufacturing PMI slipped into contraction at 49.9 (August: 50.2), as new orders declined for the first time in four months. Bank Negara Malaysia ("BNM") maintained the Overnight Policy Rate ("OPR") at 2.75%, citing stable domestic markets and contained inflation. In the fixed income market, Malaysian Government Securities ("MGS") yields moved higher alongside UST yields following the Fed's rate hike and repricing of global interest-rate expectations, with the benchmark 10-year MGS yields rose 18 bps Month-on-Month ("MoM") to 4.05%.

DISCLAIMER

Based on the Fund's portfolio returns as at 31 August 2026, the Volatility Factor (VF) for this Fund is 1.6 and is classified as "Very Low" (source: Lipper). "Very Low" includes funds with VF that are above 0 but not more than 4.515. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.
