FUND MANAGER'S REPORT

US economic data moderated but remained positive in the month with 2Q26 Gross Domestic Product ("GDP") growth slowing to 1.5% year-on-year ("YoY") (1Q26: 2.1%), while S&P Global Manufacturing Purchasing Managers' Index ("PMI") softened to 53.2 (July: 53.9), staying in expansion territory. July Headline Consumer Price Index ("CPI") eased to 3.4% YoY (June: 3.5%), although Core Personal Consumption Expenditure ("PCE") remained sticky at 3.3% YoY. Meanwhile, July non-farm payrolls declined by 23,000 (consensus: +80,000), while the unemployment rate eased to 4.1%. Federal Reserve ("Fed") maintained its policy rate at 3.50%–3.75% in July, stating persistent inflation, geopolitical tensions and higher energy prices continuing to complicate the monetary policy outlook. US Treasury ("UST") yields spiked month end following hawkish Fed remarks at Jackson Hole, which revived expectations of a September rate hike, alongside renewed US-Iran tensions and rising oil prices. The 10-year and 30-year UST yields rose to 4.75% and 5.25%, respectively, as of month end.

Malaysia's economy remained supported by strong domestic demand, stable labour market and manageable inflation, despite persistent external uncertainties. July headline inflation eased to 1.8% YoY (June: 1.9%), while the unemployment rate remained stable at 3.0%. On the external front, July exports surged 38% YoY to RM193.6 billion, mainly driven by strong growth in Electrical & Electronics shipments. Bank Negara Malaysia ("BNM") maintained the Overnight Policy Rate ("OPR") at 2.75% in July. In the fixed income market, Malaysian Government Securities ("MGS") yields trended higher alongside UST yields, with the 10-year MGS yield rising 16 basis points ("bps") month-on-month ("MoM") to 3.87%, marking its highest level since December 2024. Meanwhile, the ringgit strengthened against the US dollar, with USD/MYR easing to 4.03 as of month end (July: 4.08).

DISCLAIMER

Based on the Fund's portfolio returns as at 31 July 2026, the Volatility Factor (VF) for this Fund is 1.7 and is classified as "Very Low" (source: Lipper). "Very Low" includes funds with VF that are above 0 but not more than 4.635. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display their VF and VC.
