FUND MANAGER'S REPORT

US economic activity remained resilient, with 3Q26 Gross Domestic Product ("GDP") expanding at an annualised rate of 3.4% quarter-on-quarter ("QoQ") (2Q26: 2.2%). The S&P Global Manufacturing Purchasing Managers' Index ("PMI") eased to 54.9 (Sep: 55.9) but remained in expansionary territory. However, inflationary pressures persisted, with September Headline Consumer Price Index ("CPI") rising to 3.7% Year-on-year ("YoY") (August: 3.4%), while Core Personal Consumption Expenditure ("PCE") remained elevated at 3.1% (Aug: 3.0%). Meanwhile, the labour market showed signs of softening, as September non-farm payrolls increased by just 29,000 and unemployment edged up to 4.2%. At the October meeting, the Federal Reserve ("Fed") maintained its policy rate at 3.75%–4.00%, with two policymakers favouring a further hike. Markets continued to assess the possibility of another rate hike in December, although US Treasury ("UST") yields eased in October. The 10-year and 30-year UST yields closed at 4.94% and 5.31%, respectively, up approximately 77 bps and 47 bps year-to-date ("YTD").

Locally, Malaysia's headline inflation moderated to 1.8% YoY in September (Aug: 1.9%), while unemployment eased to 2.9% in August. Exports grew 34.0% YoY to RM1.57 trillion cumulatively in the first nine months of 2026, supported by strong electrical and electronics exports. Malaysia's S&P Global manufacturing PMI rose to 51.0 in October (Sep: 49.9), returning to expansionary territory. Bank Negara Malaysia ("BNM") maintained the Overnight Policy Rate ("OPR") at 2.75%, supported by resilient domestic growth and contained inflation. In the fixed income market, Malaysian Government Securities ("MGS") yields eased in October alongside a moderation in global bond yields, with the 10-year benchmark closing at 3.90%, up approximately 41 bps YTD.

DISCLAIMER

Based on the Fund's portfolio returns as at 30 September 2026, the Volatility Factor (VF) for this Fund is 0.2 and is classified as "Very Low" (source: Lipper). "Very Low" includes funds with VF that are above 0 but not more than 4.51. (source: Lipper). The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
