Cash rebates, if any, will be directed to the account of the Fund.

There are fees and charges involved and you are advised to consider the fees and charges before investing in the Fund.

Unit prices and distributions payable, if any, may decrease as well as increase.

You should read and understand the contents of Information Memorandum and, if necessary, consult your adviser. For information concerning certain risk factors which should be considered by you, see "Risk Factors" commencing on page 13.

RISKS FACTORS

General risks of investing in a wholesale fund

- **Market Risk**

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.

- **Manager's Risk**

This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

- **Inflation Risk**

This is the risk that investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

Specific risks associated to the Fund

- **Illiquidity Risk**

The investment to be made by the Fund would be generally illiquid. The eventual liquidity of all investment of the Fund will be dependent upon the success of the realisation strategy proposed for each investment which could adversely be affected by a variety of risk factors. The period of time required to liquidate the Fund's assets cannot be predicted with certainty.

- **Stock Specific Risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stocks will adversely affect the Fund's NAV.

- **Equity-related Securities Risk**

The Fund invests in equity-related securities such as rights and warrants, where price movement is dependent on the price movement of the underlying equities. The risk is generally higher than their underlying equities as these equity related securities are leveraged form of investment. The price of equity-related securities generally fluctuates more than the underlying equities and consequently may affect the volatility of the Fund's NAV.

- **Concentration risk**

Concentration risk is the probability of loss arising from lack of diversification, investing with a single issuer. The strength of the issuer may be affected due to changes of financial performance, news of a possible merger or loss of key personnel of the issuer.

- **Country Risk**

Investments of the Fund in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Funds invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV or prices of Units to fall.

- **Currency Risk**

As the base currency of the Fund is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

- **Credit and default risk**

Credit risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. Default risk relates to the risk than an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.

- **Interest Rate Risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments whenever is applicable. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.

- **Counterparty risk**

The Fund's placements of deposits and/or investments in money market instruments with financial institutions are subject to the risk of the counterparty. Counterparty risk also refers to the possibility that the counterparty being unable to make timely payments of interest and/or principal payment on the maturity date. This may then lead to a default in the payment and/or interest and ultimately, affect the NAV per Unit of the Fund.

Specific risks of investing in the Fund

The Fund may invest in non-tradable and non-transferable equity related securities. The Fund is suitable only for investors who have a Medium to Long term investment horizon. You will not be able to redeem your Units within the first 24 months from the Launch Date. You can only redeem once a month on the 15th of each month after the first 24 month from the Launch Date. An exit fee will be imposed on redemption between 24 to 36 month from the Launch Date. An exit fee of 8% will be imposed on redemption made between 24 to 30 month from the Launch Date and 5% for redemption made between 30 to 36 month from the Launch Date. The Fund may invest up to 100% of its NAV in equity related-securities by a single issuer.

You are advised not to invest in this Fund if you are not able to accept the risks.

The abovementioned risks which you should consider before investing into a wholesale fund should not be considered to be an exhaustive list.

You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

Transaction Information

Bases of Valuation of the Assets of the Fund

Listed securities	<p>Investment in listed securities shall be valued at the last done market price available at the close of the Business Day. However, if-</p> <ul style="list-style-type: none">a) a valuation based on the market price does not represent the fair value of the securities for example during abnormal market conditions; orb) no market price is available, including in the event of a suspension in the quotation of the securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the securities will be valued at fair value. The fair value shall be determined in good faith by the Manager, based on the method or bases approved by the Trustee after appropriate technical consultation.
Unlisted securities	<p>Unlisted securities will be valued at fair value as determined in good faith by the Manager on method or bases which have been verified by the auditor of the Fund and approved by the Trustee.</p>
Deposits	<p>Deposits are valued by reference to the value of such investments and the profit accrued thereon for the relevant period.</p>

<p>Collective investment schemes</p>	<p>Investment in units or shares in other collective investment schemes will be valued based on the last published repurchase price of the collective investment scheme.</p>
<p>Debentures</p>	<p>Investment in debentures shall be valued based on the appropriate price by referring to quotes / yields published by approved bond pricing agency (BPA). Where the Manager is of the view that the price / yield quoted by BPA differs from the "market price" by more than 20 basis points, the Manager may use the "market price" provided that the Manager records its basis for using a non-BPA price, obtains the necessary internal approvals to use the non-BPA price and keeps an audit trail of all decisions and basis for adopting the "market price".</p>
<p>Any other instruments</p>	<p>Fair value as determined in good faith by the Manager, on methods or bases which have been verified by the auditors of the Fund and approved by the Trustee.</p>

Calculation Of Unit Prices

Valuation Point

Valuation point refers to the time(s) on a Business Day as may be decided by the Manager wherein the NAV of the Fund is calculated. The Fund will be valued once a week on the first Business Day of the week.

The manager, at its discretion, may consider additional valuation point(s) for the Fund when there is a material market movement within the week (more than 5% of the last valuation point). The daily price of Units will be published on the next Business Day and shall be available upon Unit Holder's request.

For avoidance of doubt, the Manager may recognise gain/income to the Fund proportionately.

How Is The NAV (actual value) Per Unit Calculated?

The Manager will calculate the NAV of the Fund at the end of valuation point. The NAV is defined as the total value of the Fund's investment, assets and properties less any liabilities or provisions. Where applicable, investment income, interest payable, fees and other liabilities will be accrued daily in arriving at the NAV of the Fund. The NAV per Unit is then determined by dividing the NAV of the Fund by the number of Units in circulation at the valuation point rounded nearest to four (4) decimal places or as agreed between Manager and Trustee.

Illustration 1: Computation of NAV		RM
	Investment	180,000,000.00
Add:	Assets / Gain & Income	10,000.00
		180,010,000.00
Less:	Liabilities / Fees & Expenses	8,000.00
	NAV before deducting annual management fee and annual trustee fee for the day	180,002,000.00
Less:	Annual management fee for the day (2.0% per annum)	9,863.12
	GST* (6% of the management fee)	591.79
Less:	Annual trustee fee for the day (0.07% per annum)	345.21
	GST* (6% of the trustee fee)	20.71
	NAV	179,991,179.17

NAV per Unit

The NAV per Unit is then determined by dividing the NAV of the Fund by the number of Units in circulation at the valuation point. If the Units in circulation are 180,000,000 Units at the point of valuation, therefore;

Illustration 2: Computation of NAV per Unit

$$\begin{aligned}\text{NAV per Unit of} &= \text{NAV} \div \text{Units in Circulation} \\ &= \text{RM}179,991,179.17 \div 180,000,000 \\ &= \text{RM}0.999950995 \\ &= \text{RM}1.0000 \text{ (rounded to 4 decimal places)}\end{aligned}$$

Computation of Net Investment Amount and Units Entitlement

- **For investors who make a lump sum payment inclusive of fees and GST (eg. RM100,000)**

The net investment amount (excluding fees and taxes) is determined by dividing the lump sum payment (excluding bank charges) with a Charge Factor.

$$\text{Charge Factor} = 100\% + (\text{entry fee in \%} \times 1.06)$$

The number of Units invested is determined by dividing the net investment amount (excluding fee and taxes), with the NAV per Unit at the next valuation point after the Manager receives the investment application and rounded up to two (2) decimal places.

Illustration 3A: Allocation of Units to Investor

Assuming you invest a lump sum of RM100,000 of gross investment amount with an entry fee of 2% and the NAV per Unit of the Fund is RM1.200, therefore;

	RM
Gross Investment amount	100,000.00
Divided by Charge Factor: $(100\% + (2\% \times 1.06))$	1.0212
Net Investment Amount	97,924.01
Divided by NAV per Unit	1.200
Units credited to investor's account	81,603.34
Net Investment Amount	97,924.01
2% Entry Fee	1,958.48
6% GST on Entry Fee	117.51
Gross Investment Amount	100,000.00

- **For investors who prefer an even (rounded) net investment amount**

The number of Units invested is determined by dividing the net investment amount (excluding fee and taxes), with the NAV per Unit at the next valuation point after the Manager receives the investment application and rounded up to two (2) decimal places.

Illustration 3B: Allocation of Units to Investor

Assuming you invest RM100,000 into the Fund, and the NAV per Unit of the Fund is RM1.200, therefore;

	RM
Net Investment amount	100,000
Add: Entry Fee of 2% $(RM100,000 \times 2\%)$	2,000
Add: GST* $(6\% \times RM2,000)$	120
Total amount payable by investor	102,120
Net Investment Amount	100,000
Divided by NAV per Unit	1.200
Units credited to investor's account	83,333.33

Calculation of Redemption Value

The Redemption value is the number of Units to be liquidated multiplied by the NAV per Unit at the next valuation point, after the Manager receives the Redemption request.

Illustration 4: Calculation of Redemption Proceeds Paid to Investor	
Assuming you request to liquidate 150,000 Units on the 26 th month from the Launch Date and the NAV per unit of the Fund is RM1.5000, therefore;	
	RM
Number of Units liquidated	150,000
Multiply by NAV per Unit	1.500
Redemption Value	225,000
Less: Exit fee of 8% (RM225,000 x 8%)	18,000
Less: 6% GST on Exit Fee (RM18,000 x 6%)	1080
Net amount payable to investor	205,920

Distribution Channels

The Fund is distributed through the Manager's head office, branches and authorized distributors. Please refer to the directory on page 33 or call us at 03-7956 3111 for list of contacts.
