#### 3. What am I investing in?

Launch date	11 May 2009
Objective of the Fund	The Fund aims to provide stable stream of income while maintaining capital stability. Any material changes to the Fund's objective would require Unit Holder's approval.
Investment Strategy	<p>The Fund will primarily invest in a diversified portfolio of Fixed Income Investments with intention to hold until maturity. The Fund will focus mainly on those of quality debentures with Medium to Long Term maturity and some exposure to other maturity periods. Notwithstanding the above, the Fund may adopt a more concentrated strategy by holding higher exposure in a single investment in order to achieve its objective.</p> <p>The minimum credit rating of debentures that the Fund will invest is "A3" by Rating Agency Malaysia (RAM) or its equivalent rating by Malaysia Rating Corporation Berhad (MARC) at time of purchase. If a security is downgraded to below the minimum investment grade and it causes the investment limit to be breached, the Manager would use their best efforts to dispose the holdings before maturity, failing which, it shall be held to maturity.</p> <p>Notwithstanding the above, the Fund may invest up to 30% of its NAV in debentures with credit rating below "A3" by RAM or unrated securities at time of purchase. The minimum-rating requirement, however, is not applicable to securities/ instruments issued by, or backed by Government or banks.</p> <p>The Fund may invest in derivatives such as futures contracts and options to protect the Fund against adverse movement of markets.</p> <p>It is also the Fund's strategy to invest in CIS and other instrument such as preference shares. The Fund has also in place the limits and restrictions for asset allocation and diversification purposes.</p>

	We adopt an active investment strategy in managing the Fund and will invest tactically during times of uncertainty. The Fund may adopt a temporary defensive strategy during adverse market conditions where the Fund may hold its entire assets in short-term commercial papers or cash to minimize the impact of capital loss from holding long-term securities.

	Liquid Assets	Minimum 2%
Performance Benchmark	Maybank's 12-month fixed deposit rate.	
Distribution of Income and Reinvestment Policy	<p>Yearly or more frequent, subject to the availability of distributable income.</p> <p>In the absence of any instructions, we will, at our discretion, reinvest the income distribution or capital distribution of the fund into another unit trust fund as determined by the Manager at the net asset value per unit of that unit trust fund on the distribution day of the Fund without any entry fee.</p>

#### 5. What are the possible outcomes of my investment?

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed. The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the Maybank's 6-month fixed deposit rate. However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

#### KEY RISKS

#### 6. What are the key risks associated with this fund?

**PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).**

Below are the risks associated in the product which may cause significant losses if they occur.

**GENERAL RISKS OF INVESTING IN A WHOLESALE FUND**

- **Market Risk**

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political, social and/or other factors, which will result in a decline in the fund's net asset value. Market risk stems from the fact that there are economy-wide perils which impact all businesses. Investors will be exposed to market uncertainties no matter how a fund's investments are diversified. The fluctuations in the economy, political and social environment will affect the market price of the fund's investments either in a positive or negative way.

- **Manager's Risk**

This risk refers to the day-to-day management of a fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

- **Liquidity Risk**

Liquidity risks refer to the ease of liquidating an asset at or near its fair value depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices. In situation where the fund has insufficient cash and is unable to liquidate its assets due to market condition as aforesaid, redemption requests made by the unit holders are likely to be affected as the manager may not be able to fulfil its payment obligation on time.

- **Financing Risk**

The risk occurs when investors take a financing to finance their investment and thereafter unable to service the financing payments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing.

- **Performance Risk**

As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when disposed and an investment may be worth more or less than when purchased.

- **Inflation Risk**

This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

- **Non-Compliance Risk**

This risk refers to the possibility that the manager may not follow the provisions set out in the information memorandum, the deed or the relevant laws, rules, guidelines or internal operating policies which governs the fund. Non-compliance may occur directly due to factors such as human error or system failure and can also occur indirectly due to amendment on the relevant regulatory frameworks, relevant laws, rules, and other legal practices affecting the fund. This risk may result in operational disruptions and potential losses to the fund.

- **Suspension of Redemption Request Risk**

Having considered the best interests of unit holders, the redemption requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In such case, unit holders will not be able to redeem their units and will be compelled to remain invested in the fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the fund.

**SPECIFIC RISKS ASSOCIATED TO THE FUND**

- **Downgrade of Issuer Risk**

Any credit ratings given to the issuers may be subject to suspension, downgrade or withdrawal at any time. In the event any of the credit ratings of the issuers of the investments of the Fund fall below the required minimum credit ratings, the Manager, acting in the interest of the Fund, would use their best efforts to dispose the holdings before maturity, failing which, it shall be held to maturity.

- **Concentration Risk**

Concentration risk is the probability of loss arising from lack of diversification, investing with a single issuer. The strength of the issuer may be affected due to changes of financial performance, news of a possible merger or loss of key personnel of the issuer.

- **Country Risk**

Investments of the Fund in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the laws or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV or prices of Units to fall.

- **Interest Rate Risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments whenever is applicable. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.

- **Counterparty Risk**

The Fund's placements of deposits and/or investments in money market instruments with Financial Institutions are subject to the risk of the counterparty. Counterparty risk also refers to the possibility that the counterparty being unable to make timely payments of interest and/or principal payment on the maturity date. This may then lead to a default in the payment and/or interest and ultimately, affect the NAV per Unit of the Fund.

▪ **Currency Risk**

As the base currency of the Fund is in Malaysian Ringgit, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments of the Fund are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments of the Fund are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice-versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment of the Fund.

▪ **Credit and Default Risk**

Credit risk relates to the creditworthiness of the issuers of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.

**The abovementioned risks which you should consider before investing into a wholesale fund should not be considered to be an exhaustive list.**

**You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.**
