You should read and understand the contents of this Information Memorandum and, if necessary, consult your adviser. For information concerning certain risk factors which should be considered by you, see "Risk Factors" commencing on page 15.

RISKS FACTORS

All types of investments carry some degree of risks which may have an adverse effect on the price of the investments. Therefore, before making an investment decision, investors are advised to consider the different types of risks that may affect the unit trust fund. Below are some of the general risks of investing in the unit trust fund and specific risks associated with the investment portfolio of the Fund.

GENERAL RISKS OF INVESTING IN A UNIT TRUST FUND

- **Market Risk**

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political, social and/or other factors, which will result in a decline in the fund's net asset value. Market risk stems from the fact that there are economy-wide perils which impact all businesses. Investors will be exposed to market uncertainties no matter how a fund's investments are diversified. The fluctuations in the economy, political and social environment will affect the market price of the fund's investments either in a positive or negative way.

- **Manager's Risk**

This risk refers to the day-to-day management of a fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant laws or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

- **Liquidity Risk**

Liquidity risks refer to the ease of liquidating an asset at or near its fair value depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices. In situation where the fund has insufficient cash and is unable to liquidate its assets due to market condition as aforesaid, redemption requests made by the unit holders are likely to be affected as the manager may not be able to fulfil its payment obligation on time.

- **Financing Risk**

The risk occurs when investors take a financing to finance their investment and thereafter unable to service the financing payments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing.

- **Performance Risk**

As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when disposed and an investment may be worth more or less than when purchased.

- **Inflation Risk**

This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

- **Non-Compliance Risk**

This risk refers to the possibility that the manager may not follow the provisions set out in the information memorandum, the deed or the relevant laws, rules, guidelines or internal operating policies which governs the fund. Non-compliance may occur directly due to factors such as human error or system failure and can also occur indirectly due to amendment on the relevant regulatory frameworks, relevant laws, rules, and other legal practices affecting the fund. This risk may result in operational disruptions and potential losses to the fund.

- **Suspension of Redemption Request Risk**

Having considered the best interests of unit holders, the redemption requests by the unit holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In such case, unit holders will not be able to redeem their units and will be compelled to remain invested in the fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the fund.

SPECIFIC RISKS ASSOCIATED TO THE FUND

- **Shariah Non-compliance Risk**

This risk refers to the risk that the currently held Shariah-compliant instruments and Islamic Deposits and investment placement in the Fund may be reclassified as Shariah non-compliant in the periodic review of the instruments by the SAC of SC, the Shariah Advisory Council of Bank Negara Malaysia, the Shariah Adviser or the Shariah boards of the relevant Islamic indices or Financial Institutions. If this occurs, the Manager will take the necessary steps to dispose of such instruments according to Shariah Requirements, subject to the approval of the Shariah Adviser.

- **Profit Rate Risk**

Profit rate risk refers to the impact of profit rate changes on the Islamic Deposits. Profit rate fluctuations affect the Islamic Deposits' returns of the Fund. Profit rates offered by the Financial Institutions will fluctuate according to the overnight rate policy determined by Bank Negara Malaysia and this has direct correlation with the Fund's investment in Islamic Deposits. The Fund's future reinvestment in Islamic Deposits will benefit from the higher profit rate and in the event of falling profit rates, the Fund's future investment in Islamic Deposits will be reinvested at lower profit rates which in turn will reduce the Fund's potential returns.

- **Counterparty Risk**

The Fund will transact most of its investments through Financial Institutions including but not limited to brokers, dealers and banks. All transactions will carry counterparty risks until the transactions have settled. All deposits of securities or cash with a custodian, bank or Financial Institution will carry counterparty risk. Upon default by a counterparty, the Fund may be forced to unwind certain transactions and the Fund may encounter delays and difficulties with respect to court procedures in seeking recovery of the Fund's assets.

- **Credit and Default Risk**

Credit and default risk arises when there is a possibility that the issuer of Islamic fixed securities and Islamic money market instruments is unable to pay the interest/profit due or the principal repayment on time leading to a default by the issuer. An issuer suffering adverse change in its financial condition could have the credit rating of the Islamic fixed securities and Islamic money market instruments lowered. Any adverse situations faced by the issuer may impact the value as well as liquidity of the instruments. This risk is mitigated by carrying out continuous fundamental credit research and analysis to ascertain the creditworthiness of its issuer.

- **Interest Rate Risk**

This risk relates to unforeseen movements in the direction of interest rates. Interest rate movements can lead to fluctuations in Islamic fixed securities prices. Islamic fixed securities prices generally move in the opposite direction of interest rate, that is, any increase in interest rate will lead to a reduction in the Islamic fixed securities prices, thus affecting the valuation of the Fund. (Note: The interest rate mentioned above will have an impact on the management of the Fund, regardless whether it is a Shariah-compliant Fund or otherwise. It does not in anyway suggest that the Fund will invest in conventional financial instruments. All the investments carried out for the Fund are in accordance with the Shariah Requirements.).

The abovementioned risks which you should consider before investing into a unit trust fund should not be considered to be an exhaustive list. You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

TRANSACTION INFORMATION

CALCULATION OF UNIT PRICES

Valuation Point

Every Business Day is a dealing day of the Fund where the Fund is open for sale and repurchase of Units by the Manager. The Fund will be valued at least once every Business Day. The Fund will be valued at the end of every Business Day and the Manager will publish the NAV per Unit on the Manager's website at www.arecacapital.com following the valuation of the Fund.

Single Pricing Policy

We adopt the single pricing policy to price the Units in relation to investment and Redemption of Units. This means that the selling of Units by the Manager (i.e. when you purchase Units and invest in the Fund) and repurchase of Units by the Manager (i.e. when you redeem your Units and liquidate your investments) will be carried out at NAV per Unit (the actual value of the Unit). The entry fee/exit fee (if any) would be computed separately based on your net investment/Redemption amount. The single price for investment and Redemption of Units shall be the daily NAV per Unit as at the next valuation

point after the Manager receives the investment or Redemption application (i.e. forward pricing).

How Is The NAV (actual value) Per Unit Calculated?

The Manager will calculate the NAV of the Fund at the end of the valuation point. The NAV is defined as the total value of the Fund’s investment, assets and properties less any liabilities or provisions of the Fund. Where applicable, investment income, fees and other liabilities will be accrued daily in arriving at the NAV of the Fund. The NAV per Unit is then determined by dividing the NAV of the Fund by the number of Units in circulation of the Fund at the valuation point rounded nearest to four (4) decimal places or as agreed between Manager and Trustee.

Illustration 1: Computation of NAV		RM
	Securities investment	224,607,604.00
Add:	Assets	2,320,028.00
		226,927,632.00
Less:	Liabilities	210,751.00
	NAV before deducting annual management fee and annual trustee fee for the day	226,716,881.00
Less:	Annual management fee for the day (0.75% per annum)	4,658.57
Less:	Annual trustee fee for the day (0.05% per annum)	310.57
	NAV	226,711,911.86

NAV per Unit

The NAV per Unit is then determined by dividing the NAV of the Fund by the number of Units in circulation of the Fund at the valuation point. If the Units in circulation are 436,555,891 Units at the point of valuation, therefore:

Illustration 2: Computation of NAV per Unit	
NAV per Unit of the Fund	= NAV ÷ Units in circulation of the Fund

$$\begin{aligned}
 &= \text{RM}226,711,911.86 \div \\
 &436,555,891 \\
 &= \text{RM}0.5193
 \end{aligned}$$

Computation of Net Investment Amount and Units Entitlement

- For investors who make a lump sum payment inclusive of fees and any relevant taxes which may be imposed by the government from time to time.

The net investment amount (excluding fees and taxes) is determined by dividing the lump sum payment (excluding bank charges) with a charge factor.

Charge Factor = 100.00% + Entry Fee in %

The number of Units invested is determined by dividing the net investment amount (excluding fee and taxes), with the NAV per Unit at the next valuation point after the Manager receives the investment application and rounded up to two (2) decimal places.

Illustration 3: Allocation of Units to Investor	
Assuming you invest a lump sum of RM100,000.00 of gross investment amount with 0% entry fee and the NAV per Unit of the Fund is RM0.5193, therefore:	
	RM
Gross investment amount	100,000.00
Divided by charge factor: 100.00%	1.0000
Net investment amount	100,000.00
Divided by NAV per Unit	0.5193
Units credited to investor's account	192,566.92
Net investment amount	100,000.00
Gross investment amount	100,000.00

Calculation of Redemption Value

The Redemption value is the number of Units to be liquidated multiplied by the NAV per Unit as at the next valuation point, after the Manager receives the Redemption request.

Illustration 4: Calculation of Redemption proceeds paid to investor	
Assuming you request to redeem 20,000.00 Units of the Fund, and the NAV per Unit for the Business Day is RM0.5193, therefore;	
Number of Units redeemed	20,000.00
Multiply by NAV per Unit	0.5193
Net amount payable to investor	RM 10,386.00

INCORRECT VALUATION AND PRICING

The Manager will take immediate remedial action to rectify any incorrect valuation or pricing. Where the incorrect valuation or pricing is at or above the threshold of 0.50% of the NAV per Unit, rectification will be extended to the reimbursement of money–

- a. by the Manager to the Fund;
- b. from the Fund to the Manager; or
- c. by the Manager to Unit Holders and former Unit Holders.

Notwithstanding the abovementioned, if the amount to be reimbursed to an individual account is less than RM10.00 in absolute amount, the requirement to reimburse does not apply.
