(Date of Constitution: 1 December 2022)

### RESPONSIBILITY STATEMENT

This Product Highlights Sheet has been reviewed and approved by the Directors of Areca Capital Sdn Bhd and collectively and individually accept full responsibility for the accuracy of the information. Having made all reasonable inquiries, they confirm to the best of their knowledge and belief, that there are no false or misleading statements or omissions of other facts which would make any statement in the Product Highlights Sheet false or misleading.

### SPECIFIC RISK DISCLOSURE STATEMENTS

The Fund is suitable only for Sophisticated Investors who understand the degree of risks involved and believe that the investment is suitable based upon their investment objectives and financial needs; accept the investment strategy of the Company according to their risk appetite; have no need for liquidity of the investment monies; and who are able to bear the loss of a substantial portion or even all of the money they invest in.

The Fund presents a different risk than other types of funds. The Fund uses Leverage and is riskier than similarly benchmarked funds that do not use Leverage. The Fund may leverage up to 85% Loan to Value and concentrate in a single investment. Potential Sophisticated Investors are warned that they may not be able to redeem any Units within the first 12 months from the date of investment. Investors may face difficulties in redeeming their investments as the Manager may not be able to dispose of the investments.

The Fund is suitable only for Sophisticated Investors who understand the consequences of seeking potential capital growth through Leverage. You are advised not to invest in this Fund if you are not able to accept the risks.

### KEY FUND FEATURES

#### 3. What am I investing in?

Launch date	30 December 2022
Objective of the Fund	The Fund aims to provide Medium to Long Term capital growth.  Any material changes to the Fund's objective would require Unit Holder's approval.
Investment Strategy	The Fund may invest up to 100% of its NAV in permitted investments with flexible allocation in its assets to achieve a potential higher return by freely changing risk degree according to current market conditions. Depending on the market conditions, the Fund may concentrate its investments on a few selected asset classes or a single investment that has potential capital growth or that will minimize the Fund exposure to market risks.  The Fund may deploy a short to mid Term (below 5 years). Leverage strategy to increase potential returns of the Fund.  To mitigate Leverage risk, the Fund shall not leverage more than 80% LTV with additional 5% allowance in the event of depreciation or appreciation of the Fund's NAV. For instance, the Fund may leverage up to 2 times of its NAV in permitted investments or up to 3 times the NAV in Government Securities. The Fund may pledge its assets as collateral to reduce LTV or mitigate call risk.
Asset Allocation	Flexible allocation between equity and fixed income depending on prevailing economic conditions and market outlook.
Performance Benchmark	Absolute Return of 5% per annum.
Distribution Policy	Incidental, subject to the availability of distributable income.
Capital Distribution	<b>Capital distribution without cancellation / Redemption of Units ("Cash Capital Distribution")</b>

	<p>The Manager may declare Cash Capital Distribution by way of cash to Unit Holders at its discretion; Cash Capital Distribution will reduce the NAV of the Fund without reducing the total Units in circulation of the Fund.</p> <p><b>Capital distribution by way of mandatory cancellation / Redemption of Units (“Capital Redemption”)</b></p> <p>The Manager may make Capital Redemption through the compulsory Redemption of the Units held by the Unit Holders at its discretion. Capital distribution of the Fund (with or without cancellation of Units) is pursuant to the maturity of the investment, disposal of the investment by Manager or early redemption of the investment by issuer (if any) and the Manager does not intend to reinvest the investment proceeds.</p>
Financial Year End	30 November

#### 4. Who am I investing in?

Manager	Areca Capital Sdn Bhd [200601021087 (740840-D)]
Trustee	RHB Trustees Berhad [200201005356 (573019-U)]

#### 5. What are the possible outcomes of my investment?

There are many possible outcomes associated with an investment in the Fund and involves some degree of risk. Investors are to take note that the value of an investment in the Fund and its distributions payable (if any) may go down as well as up and are not guaranteed. The value of your investment is at risk depending on the underlying investments of the Fund.

Under normal circumstances, the Manager aims to out-perform the Fund's benchmark, the Lipper Synthetic Risk Free Rate 5% MYR. However, on the flip side, the Fund may post a much lower return or even incurring losses if one or more of the key risks occur. **In the worst scenario where all the investments of the Fund are in default or suspended, investors may lose part or even all of your initial investments.**

#### KEY RISKS

#### 6. What are the key risks associated with this fund?

**PLEASE BE ADVISED THAT IF YOU INVEST IN UNITS THROUGH AN IUTA WHICH ADOPTS THE NOMINEE SYSTEM OF OWNERSHIP, YOU WOULD NOT BE CONSIDERED TO BE A UNIT HOLDER UNDER THE DEED AND YOU MAY CONSEQUENTLY NOT HAVE ALL THE RIGHTS ORDINARILY EXERCISABLE BY A UNIT HOLDER (FOR EXAMPLE, THE RIGHT TO CALL FOR A UNIT HOLDERS' MEETING AND TO VOTE THEREAT AND THE RIGHT TO HAVE YOUR PARTICULARS APPEARING IN THE REGISTER OF UNIT HOLDERS OF THE FUND).**

Below are the risks associated in the product which may cause significant losses if they occur.

#### General risks of investing in the Unit Trust Fund

##### ▪ Market Risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political, social and/or other factors, which will result in a decline in the fund's net asset value. Market risk stems from the fact that there are economy-wide perils which impact all businesses. Investors will be exposed to market uncertainties no matter how a fund's investments are diversified. The fluctuations in the economy, political and social environment will affect the market price of the fund's investments either in a positive or negative way.

##### ▪ Manager's Risk

This risk refers to the day-to-day management of a fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant laws or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

##### ▪ Liquidity Risk

Liquidity risks refer to the ease of liquidating an asset at or near its fair value depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices. In situation where the fund has insufficient cash and is unable to liquidate its assets due to market condition as aforesaid, redemption requests made by the unit holders are likely to be affected as the manager may not be able to fulfil its payment obligation on time.

##### ▪ Financing Risk

The risk occurs when investors take a financing to finance their investment and thereafter unable to service the financing payments. If units are used as collateral, an investor may be required to top-up the investor's existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing.

- **Performance Risk**

As a result of the risk elements, the returns from a fund are not guaranteed. The value of the fund's investment will vary when disposed and an investment may be worth more or less than when purchased.

- **Inflation Risk**

This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

- **Non-Compliance Risk**

This risk refers to the possibility that the manager may not follow the provisions set out in the information memorandum or the deed, the relevant laws, rules, guidelines or internal operating policies which governs the fund. Non-compliance may occur directly due to factors such as human error or system failure and can also occur indirectly due to amendment on the relevant regulatory frameworks, relevant laws, rules, and other legal practices affecting the fund. This risk may result in operational disruptions and potential losses to the fund.

- **Suspension of Redemption Request Risk**

Having considered the best interests of unit holders, the redemption requests by the unit holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the fund's assets cannot be determined. In such case, unit holders will not be able to redeem their units and will be compelled to remain invested in the fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the fund.

### Specific risks associated to the Fund

- **Stock Specific Risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stocks will adversely affect the Fund's NAV.

- **Equity-related Securities Risk**

The risk of the Fund's investment in equity-related securities such as rights and warrants, where price movement is dependent on the price movement of the underlying equities is generally higher than the underlying equities as these equity-related securities are leveraged form of investment. The price of equity-related securities generally fluctuates more than the underlying equities and consequently may affect the volatility of the Fund's NAV. For example, warrants have a limited life and will depreciate in value as they approach their maturity date. If a warrant's exercise price is above the share price at any time during its remaining subscription period, the warrant will theoretically carry little value and warrants that are not exercised at the maturity date become worthless.

- **Concentration Risk**

Concentration risk is the probability of loss arising from lack of diversification, investing with a single issuer. The strength of the issuer may be affected due to changes of financial performance, news of a possible merger or loss of key personnel of the issuer.

- **Country Risk**

Investments of the Fund in any foreign countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the laws or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV or prices of Units to fall.

- **Business Risk Of Emerging Companies**

This risk is associated with investments in small cap companies. Emerging companies may be more volatile and risky compared with mature and well-established companies. Any irregular fluctuation of the stocks of these companies may affect the Unit price as the price of Units may also fluctuate.

- **Currency Risk**

As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments of the Fund are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments of the Fund are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investments of the Fund.

a) Currency risk at the Fund's portfolio level.

The impact of the exchange rate movement between the base currency of the Fund and the currency of the underlying investments may result in a depreciation of the value of the investments of the Fund as expressed in the base currency of the Fund; and

b) Currency risk at the class level.

The impact of the exchange rate movement between the base currency of the Fund and the currency of the respective Classes of Units may result in a depreciation of the investor's holdings as expressed in the base currency of the Fund,

In order to manage currency risk, we may employ currency hedging strategies to fully or partially hedge the foreign currency exposure of the Class of Units. However, every hedge comes with a cost and will be borne by the respective Class of Units.

Currency hedging may reduce the effect of the exchange rate movement for the Class of Units being hedged but it does not entirely eliminate currency risk between the Class of Units and the base currency of the Fund. The unhedged portion of the Class of Units will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the Class of Units. You should note that if the exchange rate moves favourably, the Class of Units will not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum size of entering into a hedging contract and the cost of hedging may affect returns of the hedged class.

▪ **Credit and Default Risk**

Credit risk relates to the creditworthiness of the issuer of the debt instruments and its expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.

▪ **Interest Rate Risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments whenever is applicable. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall.

▪ **Counterparty Risk**

The Fund's placements of deposits and/or investments in money market instruments with Financial Institutions are subject to the risk of the counterparty. Counterparty risk also refers to the possibility that the counterparty being unable to make timely payments of interest and/or principal payment on the maturity date. This may then lead to a default in the payment and/or interest and ultimately, affect the NAV per Unit of the Fund.

▪ **Leverage Risk**

The Fund obtains investment exposure in excess of its assets, a form of leverage to achieve its investment objective. The Fund may lose more money in market environments adverse to its daily objective than a similar fund that does not employ Leverage. The use of Leverage increases the risk of a total loss of an investor's investment. In addition, the use of Leverage may increase the volatility of the Fund and magnify any differences between the performance of the Fund and its underlying benchmark.

▪ **Capital Erosion Risk**

The Fund's investment in Leverage facilities may incur additional financing cost to the Fund. The Fund's investment may not be able to grow or generate sufficient income to repay the financing facilities. This may then lead to a default and subsequently a potential termination of the financing facilities. The Fund may have to use the Fund's assets to repay the financing cost.

▪ **Call Risk**

The Fund's Leverage and financing facilities may subject to call risk. Call risk refers to the possibilities that the financier may exercise its rights to terminate the financing facilities earlier than expected. The financier may terminate the financing facilities for a number of reasons (e.g. changes in interest rate, the Fund's abilities to repay the instalment, deterioration of the Fund's credit rating and etc.). If the financier terminates the financing facilities, the Fund may have to terminate the Leverage to repay the financing facilities. The Fund may not be able to recoup the full amount of its initial Leverage amount and may be forced to use the capital for settlement of the financing facilities.

**The abovementioned risks which you should consider before investing into a wholesale fund should not be considered to be an exhaustive list.**

**You should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.**

**FEES & CHARGES**

**7. What are the fees and charges involved?**

<b>Entry Fee (Sales Charge)</b>	Up to 3% of the net investment amount of the Fund.
<b>Exit Fee</b>	You may not be able to redeem any Units within 12 months from the date of investment.  Unit Holder will be subjected to an exit fee of up to 5% on the Redemption proceeds if the Redemption is made within 3 years from the date of investment. The exit fee will be credited to the Fund.
<b>Cooling-Off Rights</b>	Not Available
<b>Switching Fee</b>	Not Available
<b>Transfer Fee</b>	Not available, unless by operations of law or under the provision of the Deed.
<b>Annual Management Fee</b>	Up to 2.00% per annum of the NAV of the Class of Units
<b>Annual Trustee Fee</b>	Up to 0.07% per annum of the NAV of the Fund (excluding foreign custodian fee, if any).
<b>Performance Fee</b>	The Manager is entitled to a Performance Fee of up to 10% on the net total returns upon redemption or Capital Distribution, computed on each Unit Holder's account individually.  For avoidance of doubt, the net total returns for each Unit Holder's account will be calculated by comparing the investment amount (including entry fee) to redemption or capital distribution with adjustment of any income distribution during the investment period.

**How will I be notified of any increase in fees and charges?**

- A written communication will be sent to unit holders to notify of the higher rate and its effective date;

- A supplementary or replacement Information Memorandum will be lodged and issued.

## VALUATION AND EXITING FROM INVESTMENT

### 8. How often are valuations available?
