- Switching is subject to the minimum additional investment set by the respective funds.
- This instruction is to remain in force from the Commence Date until further notice in writing from the Account Holder(s) or when the Initial Starting Fund has been exhausted.

D. UNDERSTANDING COST AVERAGING ENTRY

Cost Averaging and Value Averaging are investment strategies of making regular incremental investments into Target Fund(s), usually equity-based fund, over a period of time, to reduce the market timing risk of investing your entire investment sum/portfolio in a single transaction on what might be a high-price entry point.

A. Value Averaging Entry

An initial lump sum is placed with a relatively low-risk fund such as fixed income fund ("Starting Fund"). You set the incremental target growth amount ("Target Incremental Value per Interval") on your Target Fund at each interval to form your asset base over time. At each interval, the computer will compute the value of the accumulated units of Target Fund at the prevailing market price and measure against the current period targeted asset base value. Then, adjusts the current month's contribution according to the relative gain or shortfall made on the original asset base. The adjusted contribution amount is switched from the Starting Fund to pre-allocated Target Fund(s) computed based on prevailing unit price of the Starting Fund.

For instance, you invested initial lump sum of RM10,000 in an income fund ("Starting Fund") and your goal is to increase your equity fund ("Target Fund") holdings by RM200 every month ("Target Incremental Value per Interval"). Suppose that your previous months have accumulated RM3,000 in the equity fund and the market value of the fund has grown to of RM3,050 with RM50 gain. The computer will automatically switch RM150 (RM200 – RM50) from your Starting Fund to your Target Fund, so that the goal would be to have account holdings of RM3,200 this month. The system will repeat the pattern in the following months.

B. Cost Averaging Entry

An initial lump sum is placed with a relatively low-risk fund such as fixed income fund ("Starting Fund"). Subsequently, at each selected interval, usually monthly, a fixed target amount ("Target Cost Entry Per Interval") is switched from the Starting Fund to pre-allocated Target Fund(s) computed based on prevailing unit price of the Starting Fund.

E. DECLARATIONS, ACKNOWLEDGEMENT OF LIABILITY AND INDEMNITY BY ACCOUNT HOLDER(S)

I/We hereby confirm, acknowledge and agree that I/we irrevocably and unconditionally indemnify Areca Capital Sdn. Bhd. ("ACSB") at all times against all claims, demands, actions, suits, proceedings, damages, losses, costs (including legal costs as between solicitor and own client) and expenses and all other liabilities of whatsoever nature or description which may be made or taken against or incurred or suffered by ACSB in any manner arising out of or by reason of or in consequences of ACSB acceding to my/our request or any part thereof as a result of any false or inaccurate declaration herein, except for the gross negligence and wilful default on the part of ACSB.
